

PROFILE

Senior Frontend Engineer with a decade of building for the web. As a member of Scrum and Kanban teams I've developed a variety of products: corporate websites, a clinical dental notes application, a public food delivery e-commerce platform, and several companies' in-house CMS solutions.

I've worked in both strictly regulated environments and fast-moving companies, responsible for taking features from implementation to production and making sure they delivered a great customer experience. Along the way I've learned from great mentors and mentored junior developers myself, as I genuinely enjoy sharing knowledge and helping others grow.

AI-assisted development is now part of my daily workflow, with tools such as Cursor and Claude Code helping me automate repetitive tasks, explore ideas and designs faster, and accelerate software delivery.

EXPERIENCE

Senior Frontend Engineer

Sep 2022 – Present

[Kiroku · London, United Kingdom](#)

- Build and maintain Kiroku's clinical dental notes application, used by dental practices day to day.
- Take features from implementation through to production within a strictly regulated healthcare environment.
- Work in React and TypeScript across the product, with a focus on consistent, predictable interfaces.

Frontend Engineer

Earlier roles

[E-commerce & product teams](#)

- Developed a public food delivery e-commerce platform as part of a Scrum team: catalogue, cart and checkout.
- Built in-house CMS solutions for several companies, with custom editors and role-based publishing workflows.
- Delivered corporate websites end to end, and mentored junior developers on the team.

EDUCATION

Taras Shevchenko National University of Kyiv

2013 – 2017
